

Notification of Water Tank Maintenance

Newport Utilities (NU) will be conducting scheduled maintenance on the Bybee Water Tank located off Moore Hollow Rd. NU plans on removing the tank from service on [Tuesday, May 27th](#) and return it to service on [Tuesday June 3rd](#).

Areas affected include:

- Point Pleasant
- Holt Town Rd.
- Highway 160

Water tank maintenance is necessary to ensure that the tank and its contents remain clean and safe for our customers.

Although water will remain safe during this process, customers may encounter the following conditions during the maintenance period:

- A temporary drop in water pressure to your residence or place of business
- Rusty, brown, or cloudy water (*These conditions will subside after the tank is returned to service*)

*Tip: Avoid doing laundry if water discoloration is present to prevent staining.

If water discoloration becomes an issue during this period:

- Open a cold-water faucet and let water flow until clear. When available, use an outside spigot.

Please contact NU Customer Service if you have any concerns:

☎ (423) 625-2800 option 1, then option 5
