

Notification of Water Tank Maintenance

Newport Utilities (NU) will be conducting scheduled maintenance on the Camp Carson Water Tank located off Carson Springs Road. NU plans on removing the tank from service on Tuesday, April 22nd, and will return it to service on Wednesday, April 23rd.

Areas Affected Include:

- 751 Carson Springs Rd to the Carson Springs Baptist Conference Center

Water tank maintenance is necessary to ensure that the tank and its contents remain clean and safe for consumption. Although water will remain safe during this process, customers may encounter the following conditions during the maintenance period:

- A temporary drop in water pressure to your residence or place of business
- Rusty, brown, or cloudy water
 - *These conditions will subside after the tank is returned to service.*
- Avoid doing laundry if water discoloration is present to prevent staining

If water discoloration becomes an issue during this period:

- Open a cold-water facet and let the water flow until clear. When available, use an outside spigot.

Please contact NU Customer Service if you have any concerns:

☎ (423)625-2800 option 1, then option 5
