Walker Hill Way
Auburn Way
Scarlet Road
Woodmont Way
Trentham Road
Humane Road
Suncrest Way

Water Main Flushing is a necessary function for NU's Waterline Maintenance Program, which maintains the system's overall water quality. Although **water will remain safe** during this process, customers may encounter the following conditions during flushing:

- A temporary drop in water pressure to your residence or place of business
- Rusty, brown, or cloudy water. *These conditions will subside after flushing is complete.*
- *Tip:* Avoid doing laundry during flushing operations to avoid possible staining.

After flushing operation is complete:

Open a cold-water facet and let water flow until clear. When available, use an outside spigot.
